Important Information About PRAMS

Please Read Before Starting the Survey

- The Pregnancy Risk Assessment Monitoring System (PRAMS) is a research project sponsored by the Centers for Disease Control and Prevention and the New York City Department of Health and Mental Hygiene.
- The purpose of the study is to find out why some babies are born healthy and others are not.
- We are asking 2,200 women in New York City to answer the same questions. All of your names were picked by a computer from recent birth certificates.
- It takes about 20 minutes to answer all questions. Some questions may be sensitive, such as questions about smoking or drinking during pregnancy.
- You are free to do the survey or not. If you don't want to participate at all, or if you don't want to answer a particular question, that's okay. There is no penalty or loss of benefits for not participating or answering all questions.
- Your survey may be combined with information the health department has from other sources.
- If you choose to do the survey, your answers will be kept private to the extent allowed by law and will be used only for research. If you are currently in jail, your participation in the study will have no effect on parole.
- Your name will not be on any reports from PRAMS. The booklet has a number so we will know when it is returned.
- Your answers will be grouped with those from other women. What we learn from PRAMS will be used to plan programs to help mothers and babies in New York City.
- If you have any questions about your rights in the project, please call the Rutgers University Institutional Review Board (IRB) at (732) 235-9806. If you have any questions about the NYC project, please call Hannah Searing, NYC PRAMS Director at (347) 396-4497.

If you have questions about PRAMS, or if you want to answer the questions by telephone, please call Teresa Cruz, NYC PRAMS Data Manager, at 1-888-816-7929 and press "5." The call is free.

Questions Commonly Asked About PRAMS

What is PRAMS?

PRAMS (Pregnancy Risk Assessment Monitoring System) is a joint research project between the New York City Department of Health and Mental Hygiene and the Centers for Disease Control and Prevention (CDC). Our purpose is to find out why some babies are born healthy and others are not. To do this, our questionnaire asks new mothers questions about their behaviors and experiences around the time of their pregnancy. Each year in New York City there are hundreds of babies born with serious health problems. Many of these babies die. We need your help to find out why. No matter how your pregnancy went, your answers will help us learn more about ways to improve the chances for future mothers and babies in New York City.

Will my answers be kept private?

Yes—all answers are kept completely private to the extent permitted by law. All answers given on the questionnaires will be grouped together to give us information on New York City mothers of new babies. In reports from this survey, no woman will be identified by name.

How was I chosen to participate in PRAMS?

Your name was picked by chance, like in a lottery, from the state birth certificate registry. You are one of small number of women who were chosen to help us in this study.

Is it really important that I answer these questions?

Yes! Because of the small number of mothers picked, it is important to have everyone's answers. Every pregnancy is different. To get a better overall picture of the health of mothers and babies in New York City, we need each mother selected to answer the questions. From the information you give us, we may be able to improve health care for women and children in New York City. We need to know what went right as well as what went wrong during your pregnancy. Your help is really important to the success of our program.

Some of the questions do not seem related to health care—why are they asked?

Many things in a mother's life may affect her pregnancy. These questions try to get the best picture of the new mother's health care and things that happened to her during pregnancy.

What if I want to ask more questions about PRAMS?

Please call us at our toll-free number, 1-888-816-7929 and press 5, and we will be happy to answer any other questions that you may have about PRAMS. If you prefer to complete the questionnaire over the telephone, please call us on the same number.

Please check the box next to your answer or follow the directions included with the question. You may be asked to skip some questions that do not apply to you.
